Personality Pattern of Kumauni Women

(Published in Dev Sanskriti University Journal, Vol 1, Dec. 2003)

Poonam Pandey

Abstract: The present study aims at finding out the relationship between castes and personality factors. It was carried out on a sample of 400 kumauni women from rural and urban area. Two psychological test viz. demographic data schedule, and 16 P F test were administered. The results show that the caste system affects the personality factors of kumauni women, who are Brahmin and Rajput. They are reserved, confident, and conservative and introvert. Backward kumauni women are sentimental, depressive, extrovert and venturesome.

Key words: 1. Caste
2. Personality Pattern
