DSVV CODE OF RESEARCH ETHICS

Code of ethics as adopted by the Dev Sanskriti Vishwavidyalaya (DSVV), Haridwar has been drawn on the lines of Code of Ethics and Professional Practice approved by the Board of Directors of Association for Institutional Research(AIR) Tallahassee, Florida USA and as adopted by AIR membership on 12/18/92, updated on 12/14/01 and further updated on 5/2/13.

DSVV Code of Ethics in Research provides some broad ethical statements to guide the professional lives of DSVV research scholars and to identify relevant considerations when ethical uncertainties arise. It also provides a means to learn about the ethical principles and standards that should guide the work of researchers. Code is directed to individuals and not institutions although basic tenets contained within the Code are also applicable to the colleges and universities and should be compatible with institutional codes and values. The research worker/scholars in DSVV may come from many different academic backgrounds and from many different professional experiences with considerable variation in research practices of individual colleges and universities and therefore this DSVV Code of Ethics for research is important. A researcher scholar is viewed as the "guardian of truth" or the "conscience" of the nation. DSVV Code defines a normative expectation for research scholars in their work.

Although it provides standards, the DSVV Code does not provide a set of rules. Reasonable differences of opinion can and do exist with respect to interpretation, and specific application must take into account the context of a given behavior. Adoption of a code of ethics cannot guarantee ethical behavior or resolution of all disputes. Rather, it sets forth standards to which professionals aspire and against which their actions can be judged (both by themselves and others). Ethical behavior should result from a personal commitment to engage in ethical practice and an attempt to act always in a manner that assures integrity. All DSVV research workers/scholars should pledge to maintain their own competence by continually evaluating their research for scientific accuracy, by conducting themselves in accord with the ethical standards expressed in this Code, and by remembering that their ultimate goal is to contribute positively to the field of postsecondary education. Finally, this Code is a living document that must change and be shaped as the practice of research continues to evolve and develop.

SECTION I - COMPETENCE

- a. Claims of Competence. The research worker/scholar shall not, in job application, resume, or the ordinary conduct of affairs, claim or imply a degree of competency he/she does not possess.
- b. Acceptance of Assignments. The research worker/scholar shall not accept assignments requiring competencies he/she does not have and for which he/she cannot effectively rely upon the assistance of colleagues, unless the supervisor has been adequately apprised or unless he/she would acquire the necessary competence prior to doing the research. The

- research worker/scholar should use methodologies or techniques that are new to him/her only after appropriate study, training, consultation, and supervision from people who are competent in those methodologies or techniques.
- c. **Training of Subordinates**. The research worker/scholar shall provide subordinates with opportunities for professional growth and development.
- d. **Professional Continuing Education**. The research worker/scholar has the responsibility to develop his/her own professional skills, knowledge, and performance and to keep abreast of changes in the field.

SECTION II - PRACTICE

a. **Objectivity**.

- i. **Unbiased Attitude**. The research worker/scholar shall approach all assignments with acknowledgement of personal biases and make all attempts to minimize the effect of such biases in the conduct of the work.
- ii. Conflicts of Interest. The research worker/scholar should disclose situations in which financial or other personal considerations may compromise, or have the appearance of compromising, decisions or the performance of services. Disclosure and proper management of such situations assures that unavoidable conflicts do not interfere with the integrity of performance of duties.
- b. Use of Accepted Technical Standards. The research worker/scholar shall conduct all tasks in accordance with accepted technical standards.
- c. **Initial Discussions**. Before an assignment is begun, the research worker/scholar shall clarify with the sponsor and/or major users the purposes, expectations, strategies, and limitations of the research.
 - i. Special care shall be taken to recommend research techniques and designs that are appropriate to the purposes of the project.
 - ii. Special care shall be taken to advise the sponsor and/or major users, both at the design phase and, should the occasion arise, at any time during the execution of the project, if there is reason to believe that the strategy under consideration is likely to fail or to yield substantially unreliable results.
- d. **Identification of Responsibility**. The research worker/scholar shall accept responsibility for the competent execution of all assignments which he/she, or a subordinate, undertakes, and shall display individual and/or office authorship, as appropriate, on all such reports.
- e. Quality of Secondary Data. The research worker/scholar shall exercise reasonable care to ensure the accuracy of data gathered by other individuals, groups, offices, or agencies on which he/she relies, and shall document the sources and quality of such data.
- f. **Reports**. The research worker/scholar shall ensure that all reports of projects are complete; are clearly written in language understandable to decision-makers; fully distinguish among assumptions, speculations, findings, and judgments; employ appropriate statistics and graphics; adequately describe the limitations of the project, of

- the analytical method, and of the findings; and follow scholarly norms in the attribution of ideas, methods, and expression and in the sources of data.
- g. **Documentation**. The research worker/scholar shall document the sources of information and the process of analysis in each task in sufficient detail to enable a technically qualified colleague to understand what was done and to verify that the work meets all appropriate standards and expectations.

SECTION III - CONFIDENTIALITY

- a. **Atmosphere of Confidentiality**. The research worker/scholar shall establish clear guidelines about confidentiality issues within the institutional research office.
- b. **Storage and Security**. The research worker/scholar shall organize, store, maintain, analyze, transfer and/or dispose of data under his/her control in such a manner as to reasonably prevent loss, unauthorized access, or divulgence of confidential information.
- c. Release of Confidential Information. The research worker/scholar shall permit no release of information about individual persons that has been guaranteed as confidential, to any person inside or outside the institution except in those circumstances in which not to do so would result in clear danger to the subject of the confidential material or to others; or unless directed by competent authority in conformity with a decree of a court of law.

d. Special Standards for Data Collection.

- i. Balancing Privacy Risks Against Benefits. The research worker/scholar shall, at the design stage of any project, thoroughly explore the degree of invasion of privacy and the risks of breach of confidentiality that are involved in the project, weigh them against potential benefits, and make therefrom a recommendation as to whether the project should be executed, and under what conditions.
- ii. **Developing Specific Guidelines**. Where appropriate, the research worker/scholar shall adopt a written description of any specific steps beyond the regular guidelines within the institutional research office that are necessary during a specific assignment to ensure the protection of aspects of privacy and confidentiality that may be at specific risk.
- iii. **Disclosure of Rights**. The research worker/scholar shall ensure that all subjects are informed of their right of refusal and of the degree of confidentiality with which the material that they provide will be handled, including where appropriate, the implications of any freedom of information statute. Any limits to confidentiality should be made clear.
- iv. **Appraisal of Implications**. The research worker/scholar shall apprise institutional authorities of the implications and potentially binding obligations of any promise to respondents regarding confidentiality and shall obtain consent from such authorities where necessary.

SECTION IV - RELATIONSHIPS TO THE COMMUNITY

a. **Equal Treatment**. The research worker/scholar shall promote equal access and opportunity regarding employment, services, and other activities of his/her office,

without regard to race, creed, gender, national origin, disability or other accidental quality; and in analysis, demeanor, and expression shall be alert to the sensitivities of groups and individuals.

- b. **Development of Local Codes of Ethics**. The research worker/scholar should develop and promulgate a code of ethics specific to DSVV mission and should strive to cooperate with fellow practitioners in the institution in developing an institution-wide code of ethics governing activities in common. The research worker/scholar should take reasonable steps to ensure that his/her employers are aware of ethical obligations as set forth in the DSVV Code of Ethics for research and of the implications of those obligations for work practice.
- c. **Custody and Archiving**. The research worker/scholar shall apply all reasonable means to prevent irrevocable loss of data and documentation during its immediately useful life; and, being aware of the role of data as institutional historic resource, shall act as an advocate for its documentation and systematic permanent archiving.
- d. **Assessment of Institutional Research**. The research worker/scholar shall develop and implement regular assessment tools for the evaluation of institutional research services.
- e. **Institutional Confidentiality**. The research worker/scholar shall maintain in strict confidence and security all information in his/her possession about the institution or any of its constituent parts which by institutional policy is considered to be confidential, and shall pursue from Section III of this Code all processes for that purpose as are appropriate.
- f. **Integrity of Reports**. The research worker/scholar shall make efforts to anticipate and prevent misunderstandings and misuse of reports within the institution by careful presentation and documentation in original reports, and by diligent follow-up contact with institutional users of those reports. If an institutional research report has been altered, intentionally or inadvertently, to the degree that its meaning has been substantially distorted, the research worker/scholar shall make reasonable attempts to correct such distortions and/or to insist that institutional research authorship be removed from the product.
- g. **External Reporting**. The research worker/scholar has an obligation to the broader community to submit and/or disseminate accurate information and engage in responsible reporting when requested by legitimate authority, including federal, state, and other governmental agencies and accrediting bodies. With respect to private inquiries, such as those from guidebook editors, journalists, or individuals, the research worker/scholar, should he/she respond, is bound by the same standards of accuracy, confidentiality, and professionally responsible interpretation.

Professionally responsible interpretation includes consideration of how the requesting individuals or organizations will employ the information. A sound understanding of how information will be used is fundamental to decisions regarding what type of information and supporting materials is appropriate and whether to participate with the request, if such reporting is not mandatory.

SECTION V - RELATIONSHIPS TO THE PROFESSION

a. Research Responsibilities.

- i. The research worker/scholar shall seek opportunities to contribute to and participate in research on issues directly related to the craft and in other professional activities, and shall encourage and support other colleagues in such endeavors.
- ii. The research worker/scholar should take responsibility and credit, including authorship credit, only for work actually performed and to which he/she has contributed. The research worker/scholar should honestly acknowledge the work of and the contributions made by others.
- b. **Integrity of the Profession**. The research worker/scholar should work toward the maintenance and promotion of high standards of practice.
 - i. The research worker/scholar should uphold and advance the values, ethics, knowledge, and mission of the profession. He/she should protect, enhance, and improve the integrity of the profession through appropriate study and research, active discussion, and responsible criticism of the profession.
 - ii. The research worker/scholar should contribute to the knowledge base and share with colleagues knowledge related to practice, research, and ethics. He/she should seek to contribute to the profession's literature and to share knowledge at professional meetings and conferences.
- c. **False Accusations**. The research worker/scholar shall take care not to falsely demean the reputation or unjustly or unfairly criticize the work of other research worker/scholars.
- d. **Incompetence of Colleagues**. The research worker/scholar who has direct knowledge of a colleague's incompetence should consult with that colleague when feasible and assist the colleague in taking remedial action. If efforts to change a colleague's incompetent behavior or practice are unsuccessful, the research worker/scholar has an ethical and professional obligation to use the institutional or agency guidelines for reporting such conduct.

e. Unethical Conduct of Colleagues.

- i. The research worker/scholar shall take appropriate measures to discourage, prevent, identify, and correct unethical conduct of colleagues when their behavior is unwittingly or deliberately in violation of this code or of good general practice in institutional research.
- ii. The research worker/scholar who believes that a colleague has acted unethically should seek resolution by discussing the concerns with the colleague when feasible and when such a discussion is likely to be productive.
- iii. If efforts to change a colleague's unethical behavior or practice are unsuccessful, the research worker/scholar has an ethical and professional obligation to use the institutional or agency guidelines for reporting such conduct.
